Orbital Weldheads by MK Products Created for Sanitary, Ultra High-Purity and High Pressure Tube and Pipe Jobs

Irvine, CA – MK Products offers weldheads with capacities from 1/8 inch O.D. to 6 inch O.D., are application specific and adaptable to unusual weld configurations.

The CopperHead[®] series is MK Products most cost effective and rugged in-place orbital weldheads offered in three models. The CopperHead[®] models 5001 (1/8~1 inch O.D.), 5002 (1/4~2 inch O.D.) and 5003 (1/2~3 inch O.D.) each offer versatility and high-output production rates. The water-cooled, narrow profile weldheads are lightweight and easy to handle for those awkward welds with limited access. All CopperHead[®] models are equipped with fingertip controls in the handles eliminating the need for additional remote control pendants.

The model 5006 DiamondBack[™] is MK Products' largest in-place orbital weldhead (3 inch tube O.D. up to 6 inch pipe size). Heavy-duty and versatile, the DiamondBack[™] also has a narrow profile and is perfect for process piping and weld fitting applications found in food & beverage, dairy and other sanitary process piping installations. Also great for high-pressure aerospace applications, this easy to use weldhead is simple yet robust to meet the demands of field construction or manufacturing production environments.

Established in 1966, MK Products is the original inventor of Cobramatic[®] push-pull wire feed technology and is recognized worldwide as the leader of aluminum welding systems. MK Products also manufactures MK Orbital[™] tube welding systems for exotic alloys and Aircrafter[™] table-top rotary positioners.
