### **MK Announces Mekrut Sales Company as New Representative**

**Irvine, CA** – MK Products announces Mekrut Sales Company, Inc. will be its new Cobramatic and Orbital product representative for the Northern Atlantic States and New England.

The family trio of Wes Mekrut, brother Gary and son Wesley, will team-up and represent MK Products' Northeast Region; all states from Virginia to Maine, the Eastern finger of West Virginia, Eastern New York and Eastern Pennsylvania. Mekrut Sales has a well established history of product representation for several industrial and welding related support and accessory products.

Their expertise in product distribution and support equipment along with their depth of knowledge in the welding industry, will greatly strengthen MK Products' exposure of Cobramatic GMAW push-pull and Orbital GTAW products. Mekrut Sales has chosen a superior product line to complement their already well known lines of welding accessories and products.

Many distributors will recognize Wes, Gary or Wesley from previous welding business relationships. For those who don't, contact them thru MK's website at [www.mkproducts.com](http://www.mkproducts.com), to purchase Cobramatic Push-Pull or get an Orbital Tube Welding demonstration today!

Established in 1966, MK Products is the original inventor of Cobramatic® push-pull wire feed technology and is recognized worldwide as the leader of aluminum welding systems. MK Products also manufactures MK Orbital™ tube welding systems for exotic alloys and Aircrafter™ table-top rotary positioners.
