## PRODUCT RELEASE

**IMMEDIATE RELEASE**

June 1, 2011

### **MK Products Introduces Flex Barrel Designed for Hard to Reach Welds**

**Irvine, CA** - MK Products introduces its newest product, a flexible barrel that bends from 180 to beyond 90 degrees depending on the application. The Flex Barrel offers the ability to weld in previously difficult areas found in aluminum welding. The MK Flex Barrel can also be used for hard wire applications.

The Flex Barrel is designed to fit with the air cooled versions of MK Products' most popular guns: the Prince® XL, Prince XL Spool Gun, Python® and Python LX. It can also use the same cups and tips from the CobraMAX™ and Cobra® MX MAX cup models, in addition to spring loaded tips.

Available in 12 in, 24 in, and 36 in lengths, MK Products' Flex Barrel comes standard with a Flex Barrel tip, (3/8" OD x .060" ID x 1.0" long) and #8 Flex Barrel gas cup for easier reach in tough to weld spaces. It has a 200A @ 60% duty cycle.

Established in 1966, MK Products is the original inventor of the Cobramatic® push-pull wire feed technology and is recognized worldwide as the leader of aluminum welding systems.

MK Products also manufactures orbital tube welding systems and Aircrafter™ table-top rotary positioners. ###
